

VISUALS THAT SUPPORT CONNECTION IN YOUR SPOKEN PRESENTATIONS

In this engaging, on-line program, you'll learn to create meaningful and relevant slides using a variety of visual design techniques to support the content of your presentations. This class will help you keep the focus on the connection with your listeners by creating slides that support, not detract, from your message.

MORE EFFICIENT MEETINGS • MORE EFFECTIVE CONNECTION • MORE POWERFUL RESULTS

SlideQUEST extends the strategic thinking skills of our MessageQUEST process to drive more efficient and powerful visual support. Not a PowerPoint training program, this three-part, asynchronous experience provides a simple but powerful guide for developing the critical thinking skills required to effectively execute in any visual development software program. You'll learn the importance of separating work on your content from work on your visuals, what roles a visual can play in driving connection, and how to create a visual hierarchy that ensures quick and effective connection with your listeners.
